AudioCodes Mediant Digital Gateways	Genesys Engage & PureConnect
AudioCodes SBC Gateway	Genesys Engage & PureConnect
AudioCodes SBC & related mgmt. Software	Genesys Engage & PureConnect
Interaction Application Servers	Genesys Engage & PureConnect
Interaction Collector	Genesys Engage & PureConnect
Pindrop security appliances	Genesys Engage & PureConnect
Genesys branded & Poly IP Phone Hardware	Genesys Engage & PureConnect
Poly Telephone Accessories	Genesys Cloud, Genesys Engage & PureConnect
PureCloud Edges & Peripherals	Genesys Cloud, Genesys Engage & PureConnect

End of Sales Announcement Date	October 22 nd , 2020
Last Order Date	January 31 st , 2021

Details

Genesys has made a strategic decision, at the executive level, to exit the hardware resale business. This will be accomplished via an extended partnership with <u>Arrow Electronics</u> through which customers and partners will have the option to purchase hardware products currently sold off of Genesys price sheets. This change impacts all hardware products including Genesys-branded Integrated Servers and all 3rd party hardware offerings from Poly and AudioCodes.

Beginning in **November 2020**, Genesys customers and partners will have the option to purchase 3rd party and Genesys-branded hardware products through Arrow Electronics via an external webstore. Genesys will maintain its ability to process hardware orders through the existing channels until close of business on **January 31st, 2021**.

By **February 1st, 2021**, Genesys will remove all hardware products from Genesys price sheet, and all customers and partners will transact directly with Arrow Electronics.

Existing warranties and active Genesys Care contracts will continue to be honored through Genesys. If Genesys decides to end support any products, extension of existing Genesys Care contracts will no longer be offered.

Frequently Asked Questions

What is the Genesys Hardware business?

Answer: Genesys resells 3rd party hardware and software from vendors • including AudioCodes and Poly and sells Genesys-branded Integrated Servers built on HPE and AdvanTech platforms - these include the Genesys Cloud Edge Device and the PureConnect Media and Application Servers.

These products are available on Genesys price sheets and are sold on Genesys paper. Genesys operates a warehouse and logistics center in Indianapolis known as the Product Distribution Center (PDC) from which we distribute products globally.

What is changing?

- Answer: Beginning in November 1st, 2020, Genesys Partners and Customers will be able to purchase hardware products via a Web Store managed by Genesys' Partner, Arrow Electronics.
- On **February 1st, 2021**, at the start of Genesys' 2022 fiscal year, Genesys will no longer carry these items on its price sheets and will no longer sell these products on our paper. Instead, all customers and partners will transact directly with Arrow Electronics who will manage the supply chain including global distribution.
- To start working with Arrow Electronics, please email mcase@arrow.com

When will these changes happen?

Answer: Below are the key dates for this transformation:

- November 1st, 2020: The Web Store will be made available, and customers and partners will be able to purchase hardware offerings from Arrow.
- January 31st, 2021: The final date for customers and partners to purchase hardware through Genesys
- **February 1st, 2021**: Genesys will end sales of hardware products on Genesys paper and all offerings will only be available through the Web Store. All hardware products will be removed from Genesys price sheets.

Who is Arrow Electronics?

Answer: <u>Arrow Electronics</u> is a publicly traded (ARW), Fortune 500 global electronics distribution leader based in Centennial, CO, USA. Arrow has been a long-time partner of Genesys. Arrow has extensive knowledge of the Genesys business and a strong understanding of Genesys' hardware fulfillment practices.

What product offerings will be a part of this change?

Answer: All physical hardware previously available from Genesys will be included in this change. In addition, software offerings from AudioCodes will be included in this change.

Products which will no longer be available directly from Genesys but will be available from Arrow include but are not limited to:

- Genesys-branded Integrated Servers;
- Genesys Cloud Edge Device (Mini, Micro, and V3)
- PureConnect Media Servers (All sizes)

<mark>ธ</mark>่ GENESYS^ะ

- PureConnect Application Servers (All sizes) •
- Media Server Upgrade Kits •
- AudioCodes Hardware and Software including;
- **IP** Phones
- Gateways and SBC's •
- AudioCodes Software •
- **Poly IP Phones** •

Are Genesys' existing hardware suppliers involved in this change?

Answer: Yes. All vendors that currently work with Genesys are involved in this transformation and are actively engaged in the changes. These vendors include AudioCodes, Poly, Advantech, and HPE.

Will hardware offerings still be available on Genesys price sheets?

Answer: No. Beginning February 1st, 2021, there will not be any hardware products on the Genesys price sheets.

Who will Genesys customers and partners work with if they need assistance?

Answer: Throughout the process of purchasing and through fulfillment, customers and partners will work directly with Arrow and, when necessary, Genesys resources will assist.

• For Genesys Cloud, PureConnect Premise, and PureConnect Cloud customers:

Following the fulfillment of a purchase through Arrow, Genesys Cloud and PureConnect customers will be able to engage Genesys through existing support channels. When necessary, Genesys Customer Care will engage OEM providers for additional support.

• For Genesys Engage Customers:

Following the fulfillment of purchases through Arrow, customers will need to engage directly with OEM providers for support. Existing Genesys Care support contracts will be honored and can be renewed until Genesys Care contracts expire, at which time, customers will be directed to extend support from OEMs directly with Arrow.

What if my organization has negotiated pricing or contractual agreements to acquire products from Genesys?

Answer: As an exception to the rule of all transactions being made between Genesys customers or partners and Arrow, Genesys will maintain the ability to purchase hardware from Arrow and resell it on Genesys paper through a passthrough process. This will allow Genesys to provide negotiated pricing and meet contractual obligations to transact directly with Genesys customers and/or partners. Please work directly with your Account Executive to execute this type of transaction.

Will Genesys still operate the Product Distribution Center (PDC) in Indianapolis?

Answer: No. Genesys will take orders for hardware sold from Genesys price sheets until close of business on January 31st, 2021. Following these final sales, Genesys will fulfill any outstanding orders. Following fulfillment of orders placed prior to February 1st, 2021, Genesys will begin the process of closing the Product Distribution Center in Indianapolis.

When is the last date to purchase hardware from Genesys?

Answer: January 31st, 2021 – the close of the Genesys 2021 fiscal year.

How will items sold by Arrow be supported?

Answer:

For Genesys Cloud, PureConnect Premise, and PureConnect Cloud customers:

Following the fulfillment of a purchase through Arrow, customers will be able to engage Genesys through existing support channels. When necessary, Genesys Customer Care will engage OEM providers for additional support.

For Genesys Engage Customers:

Following the fulfillment of purchases through Arrow, customers will need to engage directly with OEM providers for support.

• Existing Genesys Care support contracts will be honored until expiration. As Genesys Care contracts expire, customers will be notified that they will need to renew or extend support with the OEM providers through Arrow.

Will we still honor existing warranties?

• Answer: Yes. Any existing warranties will be honored. Return Merchandise Authorization (RMAs) will be processed and delivered by Arrow. Customers will work directly with Genesys to start this process. This will also be true for any new products purchased through Arrow.

Will all products previously available from Genesys be available through Arrow?

Answer: The majority of products previously offered through Genesys will be available through Arrow. There will be an adjustment to the full list of AudioCodes products in line with AudioCodes recent adjustments to its price sheet. In addition, this partnership and transformation will increase the number of items available from our vendors.

Will Arrow continue to sell the Genesys-branded IP Phone from AudioCodes?

Answer: Genesys branded IP phones are the OEM products from AudioCodes and share the same firmware as AudioCodes IP phone family. With this hardware transformation, Genesys will cease the Genesys branded IP phone offers with inventory exhaustion and these products will be replaced with standard AudioCodes IP phones. This transformation does not mean there is an end-of-life (EOL) needed to the Genesys branded IP phones as they are still workable products and will continue to be supported by Genesys together with AudioCodes until existing maintenance contract expiration. In the case of contract expiration, customers are able to renew the maintenance contract directly with Arrow and get support from AudioCodes.

Genesys confidential and proprietary information.

Does this include AudioCodes Software?

Answer: Yes. AudioCodes software is included in this change and will be available through Arrow.

How will this change affect shipments bound for locations outside of the United States?

Answer: All orders placed through Arrow will be fulfilled from the Arrow distribution center in the US. Customers and partners will have shipping options similar to those previously available from Genesys. As is the case today, shipping costs including duties and taxes will be the responsibility of the customer. Arrow will assist customers and partners in selecting and leveraging the appropriate options to import products throughout the world.

For other questions / answers, please send questions to GenesysHardware@genesys.com.

This announcement provides notice to enable customers and partners have sufficient time to plan ahead for the upcoming changes.
