

## 1966075 - The Web Intelligence Java Report Panel does not launch when using supported Java Runtime Environment 7 update 51 with default settings

Version 9    Validity: 22.10.2014 - active

Language English

---

### Symptom

- The WebIntelligence Java Report Panel does not launch when using supported Java Runtime Environment 7 update 51 with default settings
- A message "Error. Click for details" appears on the InfoView webpage instead
- Clicking the error reveals another message "Missing required Permissions manifest attribute in main jar:  
<http://hostname:port/AnalyticalReporting/webiApplet/ThinCadenza.jar>"

### Environment

- SAP BusinessObjects Enterprise XI 3.1
- Web Intelligence
- Java Runtime Environment 7 update 51

### Reproducing the Issue

1. Install Java Runtime Environment 7 update 51.
2. In any supported browser, login to InfoView and create a new Web Intelligence report using the Java Report Panel.
3. A popup window appears "Do you want to run this application?". Click **Run**.
4. Instead of launching Java Report Panel, an error "Error. Click for details" appears.
5. Clicking this error reveals the additional message "Missing required Permissions manifest attribute in main jar:  
<http://hostname:port/AnalyticalReporting/webiApplet/ThinCadenza.jar>"
6. Clicking the **Details** button opens up the Java console and shows the same message.

### Cause

The issue has been identified and tracked under ADAPT01709990.

### Resolution

A fix for this issue will be included in the following Fixpacks, when available:

- FixPack 6.4
- FixPack 7.1

#### Potential Workaround:

1. Go to Control Panel, double click **Java** to open the **Java Control Panel**.
2. Click on the **Security** tab and change the slider from default setting of "High" to "Medium".
3. Click **OK** to save the changes. The Java Report Panel should now be launched without any errors.

If this does not work, you will need to upgrade to one of the above Fixpacks.
